

# ETINCEL

Registered in:  France

YIELDS	
COUNTRY	France
Récolte 2010 & 2011	110%* treated protocol / 110.2%* Untreated protocol

\*= Official trials in these countries these years

**Breeder Comment:**

ETINCEL is a mid early 6 rows winter barley for brewing. It has a good resistance to lodging and winterhardiness. It has an excellent yielding.

The alliance between agronomy and brewing technology made it the cereal the most cultivated in France.

ETINCEL is now a Preferred Variety for the French committee: the CBMO.
