YIELDS

COUNTRY	France
Récolte 2010 & 2011	108.5%* treated protocol / 110.9%* Untreated protocol

*= Official trials in these countries these years

Breeder Comment:

ISOCEL is an mid early 6 rows winter barley for brewing. It is has a good resistance to lodging and winterhardiness. It has an excellent yielding.

The alliance between agronomy and brewing technology made it one of the cereal the most cultivated in France.

ISOCEL is now a Preferred Variety for the French committee: the CBMO.
